

## **GLOBAL 999 OFFERS AERO MEDICAL TRANSFER OF MEDICAL TOURISTS**

We are glad to inform you that Global 999 can help you enhance your medical tourists business by organizing aero medical transfer of your patient from their country of origin to your hospital by charter flight under medical care. Since we have an excellent track record in handling elective transfer of patients from hospitals in India to various countries, we will be able to design a competitive package for aero medical transfer of your medical tourists. Instead of travel by commercial flights with its attendant hassles, a charter flight under medical care offers your medical tourists many benefits for relatively small additional cost.

**Details of Our Services, Air Transportation , Record of Aero medical Evacuations Done, Strength of Our Medical Service, Life Sustaining Equipment Utilized, Additional Services Provided** are already covered in the home page under paragraph, "Elective Transfer of Patients". Breakdown of Costs will however be as per the Medical Tourists travel plan.

The aero medical transfer of medical tourist will be undertaken by a charter Jet such as Citation Excel, capable of intercontinental flights. The charter Jet will be equipped with necessary medical equipments, doctors; paramedics etc and the patient will be under medical supervision from the time of departure till they are handed over to your hospital authorities. As the capacity of these jets are 7 or 8 + crew, if the patient is able to sit and travel, more patients can be accommodated on cost share basis .As aero medical flights have a higher priority than airlines, the patients are assured of hassle free transfer from their homeland to hospitals in India under medical supervision.

### **Aero medical flights for Rest & Recuperation**

Once the patient is discharged from the hospital and if the tourist decides to rest and recoup in a resort outside the city or at any other location, Global 999 is willing to organize the air transportation of the tourist to the resort by suitable aircraft/helicopter along with a paramedic or a nurse. For two or more tourists wanting to recoup in the same resort, it can be arranged on cost sharing basis.

### **Transfer back home**

After finishing surgery or medical procedure patients wanting to return to their home country can also opt for aero medical transfer to their home country by chartered flights with or without medical supervision. Again if two or more patients opt to travel to the same destination, the transfer can be arranged on cost sharing basis.

Base on the tourist's option, we can design a package for aero medical transfer by charter jet. For further details contact, Dr. G .Sairamanan M.D 09840099639
