

Global 999 Air Rescue

- **Our Services include**

- **Critical care doctors and paramedics and any other aero medical personnel required to meet the patient's medical needs**
- **All instruments necessary for evacuating patients of various level of illness—viz. critically ill, fractures, heart attack.**
- **Necessary equipment for transferring the particular patient.**
- **A well equipped – Ambulance i.e. Hospital on wheels with all the necessary equipment including the ventilator to transfer the patient from the airport to the referral hospital being handled by Global in India and by our clients in other countries.**
- **Emergency medicines – necessary.**

- **In addition, we provide**

- **Medical Escort.** When the patient is ambulatory, we can provide the assistance of a “medical escort.”

- **Commercial stretcher on National & International carriers :** We handle patients not in need of critical care measures and requires blocking out rows of seats to allow a Regulator approved stretcher to be placed on the commercial airline. A curtained area would become the patients “room”, we make all of the needed arrangements and use our aero-medical staff and equipment.

- **Level of Operations**

- **At inter national levels, we arrange jet aircraft to transport the ailing from airport to airport in the shortest time .Our services include ground transportation, medical staff, aircraft configured and equipped as a mini intensive care unit to handle Critical Care patients. All aero medical**

- **staffing is customized to the patient’s particular needs.**
